Draft Terminal Layout

Design Considerations

This layout was inspired by public feedback. It will remain a work in progress throughout the federal permitting process.

Traffic

- Maintain easy, safe neighborhood access for residents
- Direct terminal traffic to E Judge Perez to avoid neighborhoods
- Continue working with partners on a third connector roadway
- Plan for future terminal connection

Sustainability

- Invest in shore power to reduce ship emissions
- Invest in electric equipment and vehicles to minimize emissions on the terminal
- Mitigate wetland loss
- Develop drainage canal to serve Violet Square

School & Park Relocation

- Fund construction of a new school and park within the Violet community
- Phase construction around existing school if new facility is not complete

Rail

- Avoid new ground-level rail crossings
- Continue working with partners on rail network improvements
- Manage noise and traffic

Self-Sustaining Utilities

- On-site drainage system
- On-site Entergy substation
- Exploring options for on-site sewage treatment plant

Buffer

- Develop buffer space between the terminal and neighborhoods
- Minimize noise
- Consider green space, sound walls, etc.

Cemetery

- Keep in place with room for expansion
- Easy and safe access

Community Input

 Continue to consider community feedback on the layout
